

Job Description

ARCS Solutions specializes in Business Intelligence and Business Performance Management (BPM) solutions. We help our clients achieve results by identifying, defining and measuring business performance data that is linked to corporate strategies. At ARCS Solutions, we provide applications that allow your company's decision makers to align their business decisions with their strategies, or to refine their strategies based upon real-time data; enabling our clients to maximize profitability. Our solutions allow companies to get real-time analysis and rapid results for budgeting, planning, reporting and consolidations using the latest in technology. With ARCS, companies execute their strategy and drive performance by providing business process and information technology expertise throughout every level of the organization.

Responsibilities

- Collect and document business requirements
- Interact with client personnel in finance and information systems
- Architect Business Performance Management solutions
- Prepare detailed designs documents and technical specifications
- Assist in all aspects of the sales process from proof-of-concept development to presentations
- Develop financial solutions utilizing cutting-edge in-memory OLAP technology
- Design test plans and test cases
- Create and maintain all system administration and end-user documentation

Qualifications

- Minimum 5+ years development experience working with OLAP technologies: Cognos BI, Cognos TM1, Hyperion and Business Objects
- Knowledge of planning, budgeting, and forecasting functions and business processes.

Education

- Bachelors degree in finance, business and / or computer science (MBA and / or CPA desirable)

Technical Experience

- Experience implementing Cognos 8, Cognos TM1 Executive Viewer and TM1 Web
- TM1 server administration and TM1 dimension and cube development
- Familiar with ETL development using Turbo Integrator with relational databases
- Proficient with Microsoft Outlook, Excel, Word, PowerPoint, Visio and Project
- Experience with IIS, .NET, HTML, VBA and MS FrontPage, MDX
- Experience in implementing OLAP multi-dimensional security

30-50% travel may be required

Thank you for your interest in ARCS.
